For more than 30 years, our team of general and specialty dental professionals have provided our community with the very best comprehensive dental care.

Our team of specialists and general dentists are dedicated to providing our patients with the highest standard of dental care available. Our patients can rely on our general and specialty dentists to provide for all of their dental needs at all stages of life. Because we are a multi-specialty practice, this also means that we rarely “refer out” our patients for treatment.

Conveniently located in the Morris Park neighborhood of the Bronx, Morris Park Dental is easily accessible from the Bronx, New York City and Southern Westchester.
