needed-I had no clue how to do it... Well I tried once, burned my fingers because I grabbed hot bulb then had the wrong type of bulb that didn't fit! I was looking for a solution online, because I didn't know where to call for an electrician. I found this pretty lime green website that was servicing the area I live. So the next day I had a nice guy come over and change all the light bulbs in the house that were out. In addition what I liked most- he told me why they kept burning out... they were high wattage bulbs that were overwhelming the fixtures... So far my first experience with electricians was pretty good. I'd definitely recommend 'first class electric' to my friends. Fast and professional--exactly what I needed.
