OUR SERVICES

WIRELINE

Fiber Optic Infrastructure

Whether the job calls for fiber splicing, fiber pulling, rodding, roping, or any other fiber related tasks, our highly trained, knowledgeable, and efficient crews deliver industry leading services.

Fiber Splicing

Aerial Fiber Systems

Coax Splicing

Aerial Coax Systems

Data Center Construction

WIRELESS

Growing the 5G Movement

Our construction teams expertly collaborate with our customers to design and install infrastructure that satisfies the ever growing demand for network capacity, including ultra fast broadband, 5G networks and densified fiber deployments.

DAS Installation

Small Cell Installation and Testing

Design Engineering

Wireless Tower Electrical and Site Grounding

ISP / OSP

Physical Infrastructure

Our team is renowned for our construction expertise, offering a wide range of Inside Plant and Outside Plant services. Our commitment to going

above and beyond for our clients is evident in our 24/7 emergency response services.

ISP Services

- Fiber /Copper Building Installations
- Core Drilling
- Fiber Placement
- Fiber Conduit Installation
- Rack and Stack
- Fusion Splicing
- OTDR Testing

OSP Services

- Directional Boring
- Open Cut Trenching
- Hydro Excavation
- Micro Trenching
- Auger Boring

MUNICPAL/SMART CITY

Infrastructure

HYLAN understands that robust and reliable connectivity is crucial for the success of any smart initiative. Our team of certified technicians, adhering to the highest safety and quality standards, leverages streamlined logistics to ensure projects are completed on time and within budget.
