Are you looking for the best dentist in Jackson Heights, NY?

You have found the top, family-oriented, general and cosmetic dental practice in Queens, NY

Welcome | Bienvenido (/landing-spanish)

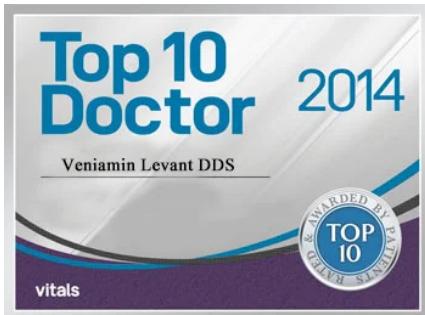

Experience matters when it comes to your smile. Our team of highly skilled dentists brings over 60 years of combined experience in general dentistry, cosmetic dentistry, and restorative dentistry. At our state-of-the-art dental office, we use the latest digital dental technologies, including digital X-rays, intraoral cameras, and advanced 3D scanning and printing. These cutting-edge tools allow us to provide precise, comfortable, and efficient treatments—from fillings, veneers, and dental implants to complex full mouth restorations.

Alliance Dental Center is a **full-service family dental practice in Jackson Heights, Queens, NY**, conveniently located at 84-11 Northern Blvd near Elmhurst, Woodside, East Elmhurst, and Astoria. Since 2002, our experienced dental team has been proudly providing comprehensive general, cosmetic, and restorative dentistry to patients from Jackson Heights and surrounding Queens neighborhoods, including Forest Hills and Flushing.

Whether you are searching for the best **Jackson Heights dentist** or a top-rated dentist in New York City, Alliance Dental Center is here for you. Our professional dental team creates a friendly, relaxed atmosphere where every patient is treated with the kindness and respect they deserve. Don't take our word for it, for real experiences of people just like you, just read our reviews (/reviews)from our existing patients.

While we are located in Queens we see patients that travel to us from all over the tri-state area. We perform a large number of procedures (/allservices)such as **Fillings** (/services-fillings), **Root Canal Treatment** (/services-rootcanaltx), **Dental Crowns and Bridges** (/services-crownsbridges), **Dental Veneers** (/veneers-and-lumineers), **Dental Implants** (/services-implant), **Zoom Advanced Dental Whitening** (/zoom-

professional-dental-teeth-whitening), and **Dentures** (/dentures)under one roof right in our office. Being able to provide all of these quality services in one location allows us to save you time by eliminate the need for time consuming and costly specialist referrals.

The staff at Alliance Dental Center is very warm and welcoming. From the second you walk in, and until you leave, you feel like they are there by your side the whole visit!

— Miradin V.
(Confirmed Patient)

The staff is always very friendly and answers any questions one may have. The wait can be long at times but I don't mind since they always have good music playing. The dentist takes his time to explain anything until you understand and tries to be as gentle as possible. I wouldn't go to any other dentist -

— Monica R.
(Confirmed Patient)

Great experience I hadn't been to the dentist in a while, so I was nervous. I was very pleased with all of the staff, the service, and the modern equipment. The price was also very affordable for someone without insurance.

— Noah L.

Initial Visit (/firstvisit)

During your Initial dental visit we will take your digital dental x-rays (/digital-x-rays). We encourage you to bring records from your previous dentist so that we can compare them to your current dental x-rays. Digital dental X-rays are a useful diagnostic tool when helping your dentist detect damage and disease not visible during a regular dental exam. You will also receive a dental cleaning known as dental prophylaxis. This dental maintenance procedure is done for patients who have healthy gums. If gum disease such as gingivitis or periodontitis is present, a more extensive treatment may be necessary and will be discussed with you by your treating dentist. Your dentist will also check every tooth to make sure all of your teeth and gums are healthy and problem free.

Dental Fillings and Crowns (/services-crownsbridges)

Your treating dentist will check your teeth and let you know if any dental treatment is necessary. Dental restorations can range from minor dental fillings to more extensive dental crowns and dental bridges. Dental fillings are done using tooth colored, metal free, composite materials and are a restoration of choice for teeth with minor damage from either dental cavities or breakage.

If a larger restoration is required, a dental crown may be right for you. A dental crown provides full tooth coverage and looks exactly like a natural tooth. If you are missing a tooth, a dental bridge or an implant may be necessary.

Root Canal Treatment (/services-rootcanaltx)

Root canals are needed for a cracked tooth from injury or genetics, a deep cavity, or issues from a previous filling. Patients generally need a root canal when they notice their teeth are sensitive, particularly to hot and cold sensations or to percussion.

Dental Implants and Tooth Replacement (/services-implant)

A dental implant is a titanium post that acts like a tooth root. An implant is surgically positioned into the jawbone beneath the gum line that allows your dentist to mount replacement teeth or a bridge into that area. An implant doesn't come loose like a denture can. Dental implants also benefit general oral health because they do not have to be anchored to other teeth, like dental bridges (/services-crownsbridges).
