

MANHATTAN DENTIST

# Manhattan Dentist

We are open to see all patients in office. We also offer telemedicine and are happy to meet with you online to discuss any concerns.

The Manhattan Dentist is located in NYC, near Rockefeller Center and Times Square, in the Fred F. French Building, at 5th Avenue and East 45th Street.

**Manhattan Dentist**, provides full services in general and cosmetic dentistry. Focused on providing high-quality work with a conservative approach.

Drs. David and Rebecca Binder DDS excel in all aspects of cosmetic dentistry, including crown and bridge, veneers, bonding, and implant restorations.

Dr. Binder is distinguished in the field of dental implants and in dental sleep apnea treatments.

## A Conservative Dentist

Your dental health and smile are very important to your well being. You want a dentist who is experienced and current with the latest technology; a dentist who emphasizes preservation of your teeth and offers you conservative therapies whenever possible.

*The Manhattan Dentist and his staff take pride in providing you with their best dental work and services.*

## A Dentist Focused on Your Needs

Because color, shape, and alignment make the difference in the perfect match for porcelain restorations, the Manhattan Dentist has an on site dental lab technician. Our lab technician is on-site, as needed, to gather requirements. We care, not only about the aesthetic values, but more importantly, about your safety. We are confident in the materials, quality, and the workmanship of our restorations.

## Our Services

The Manhattan Dentist is dedicated to achieving excellence; we strive to meet our patients' needs through education, advanced technology and a caring environment. We offer the most modern dental restoration techniques:

- Dental Implant
- Ceramic Porcelain Crown
- Porcelain Laminate Veneers
- Cemented Dental Bridge
- Removable Partial Denture

MANHATTAN DENTIST

For over twenty years, The Manhattan Dentist had taught dentistry to dental students and dentists at the New York University College of Dentistry. This included subjects such as prosthetics, dental implants and crowns. He now teaches Dental sleep medicine to sleep physicians and dentists about the treatment of snoring and sleep apnea with a dental appliance.
