FAQ's

Frequently Asked Questions

Find quick answers to common questions about our services and commitment to quality electrical work in NYC.

Do I need a licensed electrician for new construction projects in NYC?

Yes. New York City requires all electrical work in new construction or major remodeling projects to be performed by a licensed and insured electrician. Our team of certified electricians ensures that all installations meet NYC building codes and pass city inspections.

How do you ensure the safety of your home during the electrical work?

How do I choose the right electrician in New York for a remodel?

()

Do you offer post-construction electrical repair services in New York?
