Used yelp to get quotes for my window AC installation, these guys were the first to promptly answer and give me a competitive rate. I contacted prime in the morning because my kenmore 12k BTU seemed to be too challenging of an installation. I'm glad I did, they came same day and did an awesome job....

Minisplits

Healthier Choice for Your Cooling and Heating

Free estimate

Best Brands for the units

Quality installation

Warranty support

The advantages of the Mini-split Systems

- Each indoor unit can be operated independently via remote control
- Choose from a variety of indoor unit styles
- Provide both heating and cooling (not simultaneously)
- High energy efficiencies
- Quiet operation
- They mount high on a wall, out of sight and do not require ductwork, increasing energy efficiency.
- Easy maintenance
- High delivered efficiency means lower utility bills

Why Mini-Split Systems are the Healthier Choice for Your Cooling and Heating?

- Lack of ductwork means no mold or dust
- Mini-splits circulate the air throughout the room, so it's not sitting in the ductwork
- More air changes over the coil in 24 hours than in a central air system, so a mini-split does a better job filtering out allergens

Long-life+ Ion Deodorization Filter

The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine particle ceramic. The filter can be used for approximately 3 years if it is washed with water when dirty to restore its surface action.

Apple-Catechin Filter

Dust, mold spores and micro-organisms are absorbed onto the filter by static electricity and growth is inhibited and deactivated. Filter last 3-12 months.

THE FILTERS KILLING 87% BACTERIAS

This system save health of your Family!
