## Since 1980 - Controlled Combustion

Keep your residents satisfied, your customers happy, and your energy consumption low with a well-maintained heating system.

Industrial boiler service and industrial boiler repair companies play a critical role in maintaining the functionality of your heating system. At **Controlled Combustion**, we understand the importance of boiler repair and maintenance for commercial buildings. Our team of experienced boiler and heating engineers is dedicated to ensuring that your heating system runs smoothly throughout the year, no matter what your fuel type is. So, consider our company when you are searching for “boiler replacement companies”, “oil boiler service near me,” or “boiler maintenance services near me” whether you need industrial burner service, a residential boiler, heating boiler repair, or any other commercial HVAC services. Our technicians are experts at servicing gas boilers and oil boilers, as well as any other type of boiler. We also keep our average costs low, both installation costs and repair service costs. Additionally, we let you know what our installation cost will be upfront.

We provide the best energy savings and the most efficient boilers to keep our boiler repair and maintenance costs down whether your facility has steam boilers, electric boilers, or a natural gas boiler. Many older boilers are still running and could benefit from our boiler maintenance program. Keep your residents happy with hot water during the cold winter months by letting us service your boiler. A boiler typically lasts for years, but gas boilers should have annual boiler service to ensure they are operating safely and efficiently. It is important to check the relief valve, heat exchanger, boiler flue, gas line, and other vital parts of your heating equipment. Checking the boiler flue is crucial as this is what removes the dangerous flue gases, including carbon monoxide, from your boiler and directs them away from the house. Whether it's a replacement boiler or a new HVAC system, our commercial HVAC contractors are ready to install and maintain it to ensure it functions correctly and efficiently.

Additionally, we know boilers cost a significant amount. So, unlike some other boiler replacement companies, we make our costs clear upfront to avoid any surprises.

## New York Boiler Repair Experts

Our boiler repair experts are well-equipped to handle various heating complications, including problems with your central heating, rooftop unit, heat pumps, electric boilers, or industrial heaters. We service natural gas-fired, LPG gas-fired, and oil-fired industrial boilers.

We understand that even the simplest malfunction or breakdown of business-critical equipment, such as your heating and cooling system, can negatively affect your profit and productivity. Regular maintenance should be provided to keep your heating system running smoothly.

We are committed to ensuring that your commercial building remains up to code and energy-efficient. An inefficient heating system can impact your employees' performance, cause dissatisfied customers, and increase your energy consumption, which can lead to significant losses. So, make sure your heating system is ready when winter comes by having Controlled Combustion handle your annual maintenance. Also, for those businesses in need of a new HVAC system, our commercial heating installers are ready to install your new high-efficiency system and make sure it is working correctly and efficiently. Additionally, Controlled Combustion is qualified to perform some boiler inspection services. When we perform boiler inspection services, we will keep records of the service for the required amount of time.

Our company also holds the National Board Accredited "R" Stamp for Boiler & Pressure Vessel Modification & Repair, ASME H-Stamp for Steel Boiler & Pressure Vessel Fabrication, and the ASME U-Stamp for Manufacturer of Metallic Pressure Vessels.

Controlled Combustion is located in Bronx, New York but offers the following commercial heating services in all of NYC including [Bergen County](#), [Rockland County](#), [Staten Island](#), [Brooklyn](#), [Harlem](#),

Queens, [Westchester](#), [Yonkers](#), and [Manhattan](#). Our experts are dedicated to helping businesses maintain a high-performing team and a conducive working environment.

## Installation

Our highly-trained specialists install burners, boilers, and chimney liners to keep your heating system performing correctly. We also offer burner upgrades and gas conversions, decreasing your fuel expenses and carbon emissions.

## 24/7/365 Emergency Service

Unlike some other HVAC companies, we keep our communication lines open all day so you can immediately reach us for emergency repairs. Our skilled New York City boiler repair experts are familiar with different kinds of heating complications or hot water problems, allowing them to handle your issue as quickly as possible. Whether it's your industrial burner, circulator pump, heat pumps, industrial heaters, oil burners, or something else, we can help with most any boiler issues. We can service natural gas-fired, LPG gas-fired, and oil-fired industrial boilers.

## Maintenance

Consistent upkeep is necessary to preserve the condition of your heating or air conditioning system. Our commercial boiler service provides a range of maintenance services for your boiler and pressure vessel, including cleaning, overhauls, and tests, to make sure your appliances are functioning as they should. We are experts in commercial boiler maintenance. Also, don't forget us for your annual service or heating installation or when searching for "boiler maintenance services near me" or "oil boiler service near me".
